

A mockup of a web browser window displaying a login page for the IAU Library. The browser's address bar at the top shows three empty circles. The page features the IAU Library logo, which consists of a stylized geometric icon and the text "IAU LIBRARY" in a bold, italicized sans-serif font. Below the logo is a horizontal dashed line. The main content area of the browser window has a light gray background and contains the following elements: a large "Login" heading, a subtext "Sign in to continue", an "EMAIL" label above a text input field containing "OOP2@iau.edu.sa", a "PASSWORD" label above a text input field containing "*****", and a dark gray "login" button. On the right side of the browser window, there is a vertical scrollbar and a small icon in the top right corner representing a full-screen or expand function.

student name's:	ID:
(Leader) Haneen Fahad Marzouq Al-Dossry	2240003825
Kayan Mohammed bin Nawar Al-Mutairi	2240004796
Haya Adnan Abdullah Al-Awaid	2240007408

Noor Baqer bin Abdullah Ashour	2250040098
Hana Mohammed Mukhlis	2240009110

Section Number : 2

Project Group : 2

PROJECT OBJECTIVES :

- Help students and teachers easily access and manage educational resources.
- Implement a fully functional login and registration system using Java Swing and JDBC.
- Solve the difficulty of organizing and finding subject-specific materials.
- Build a role-based system that separates features for students and teachers.
- Improve our technical skills in Java programming, GUI development, and connecting Java to a MySQL database
- Ensure smooth user interaction by handling errors and invalid inputs through proper exception handling and GUI dialogs.
- Provide an efficient way to manage, export, and view resources.

After logging in, students can select their academic level to view available subjects

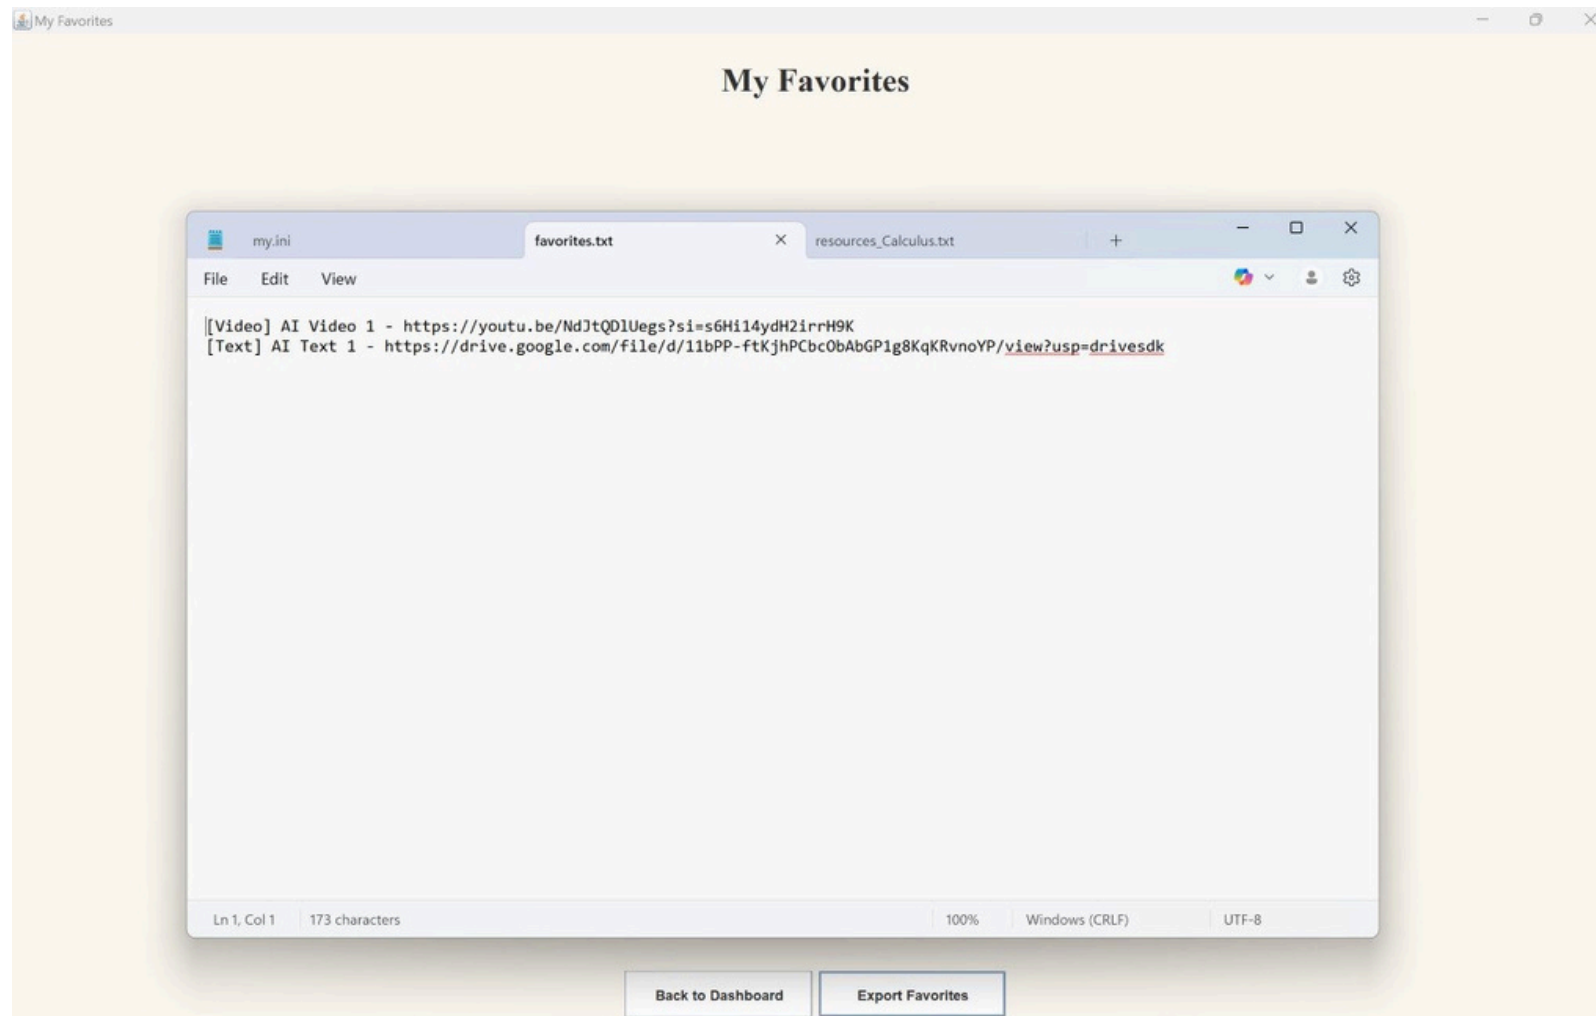

Students are presented with the subjects available in the selected level to access the corresponding learning resources.

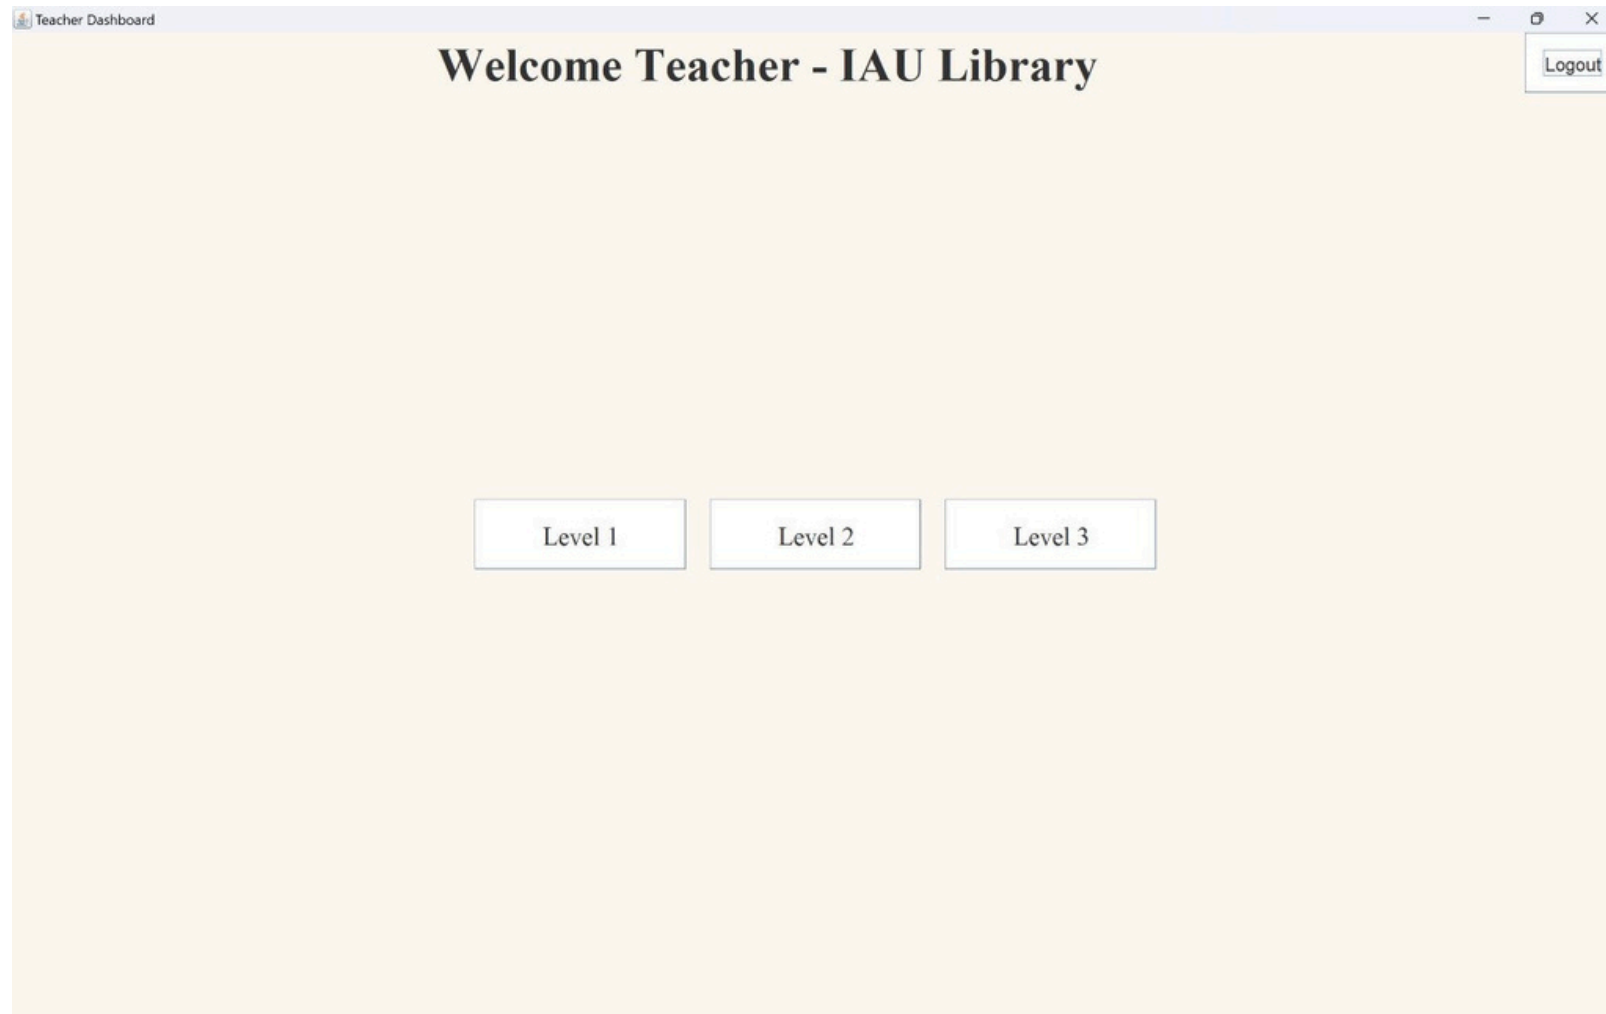

This page displays all available resources for the selected subject, allowing students to add or remove them from favorites.

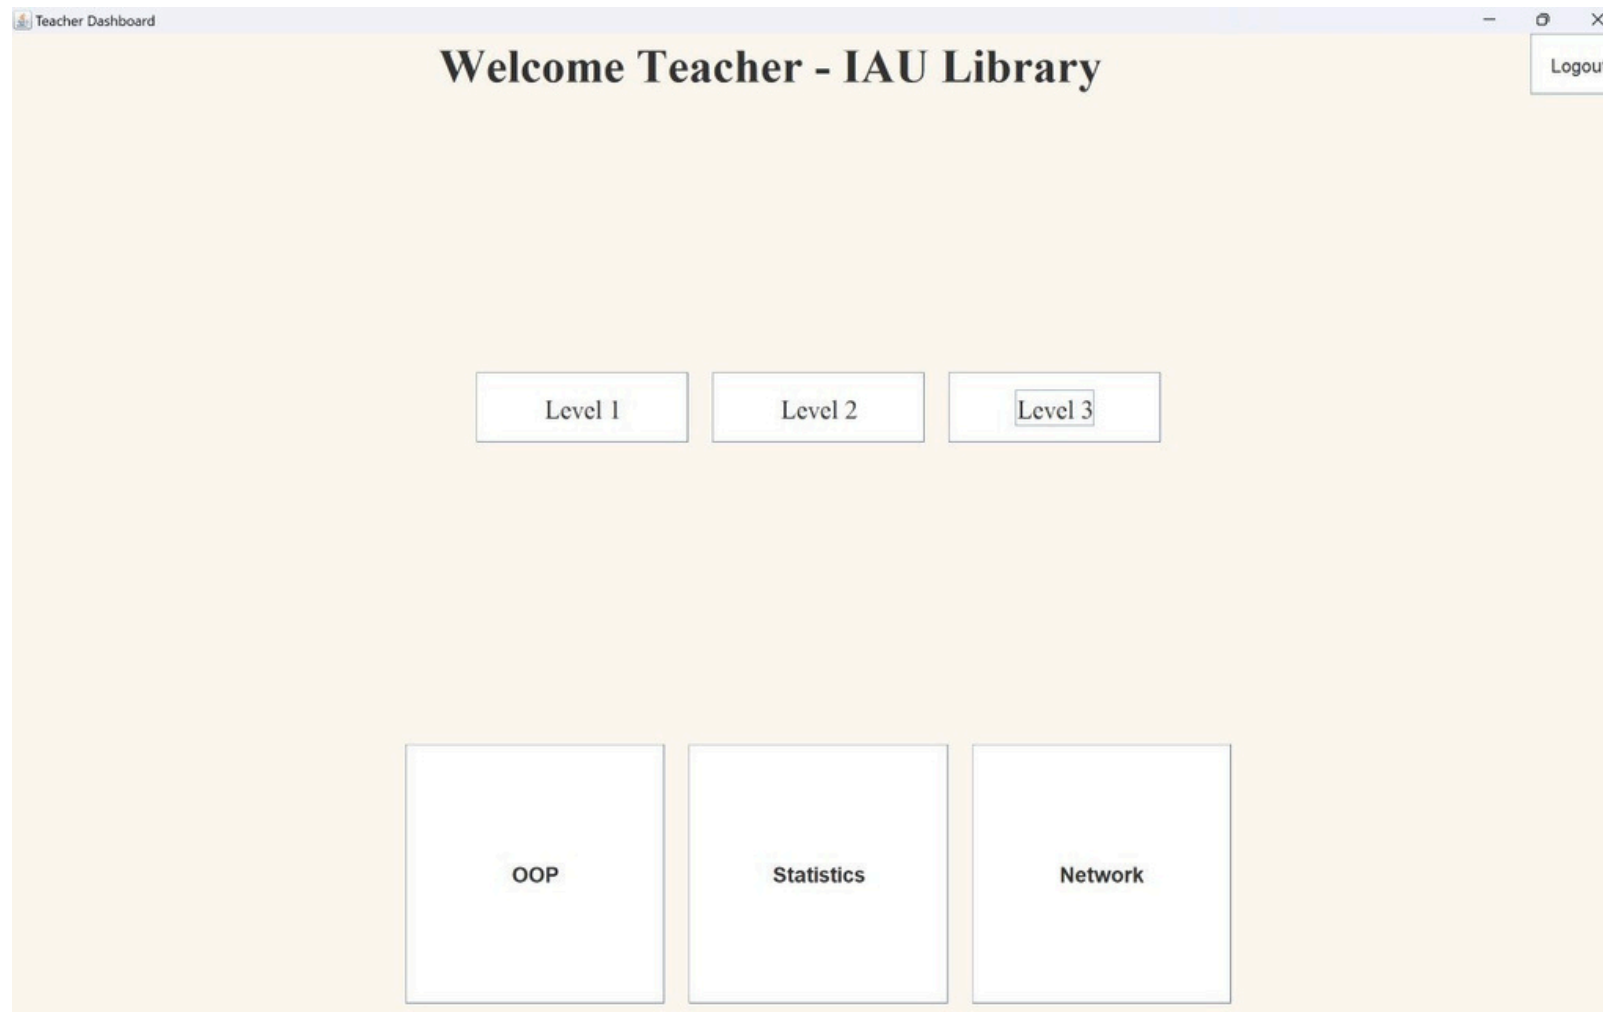

Students can view all saved favorite resources, with options to open or remove them.

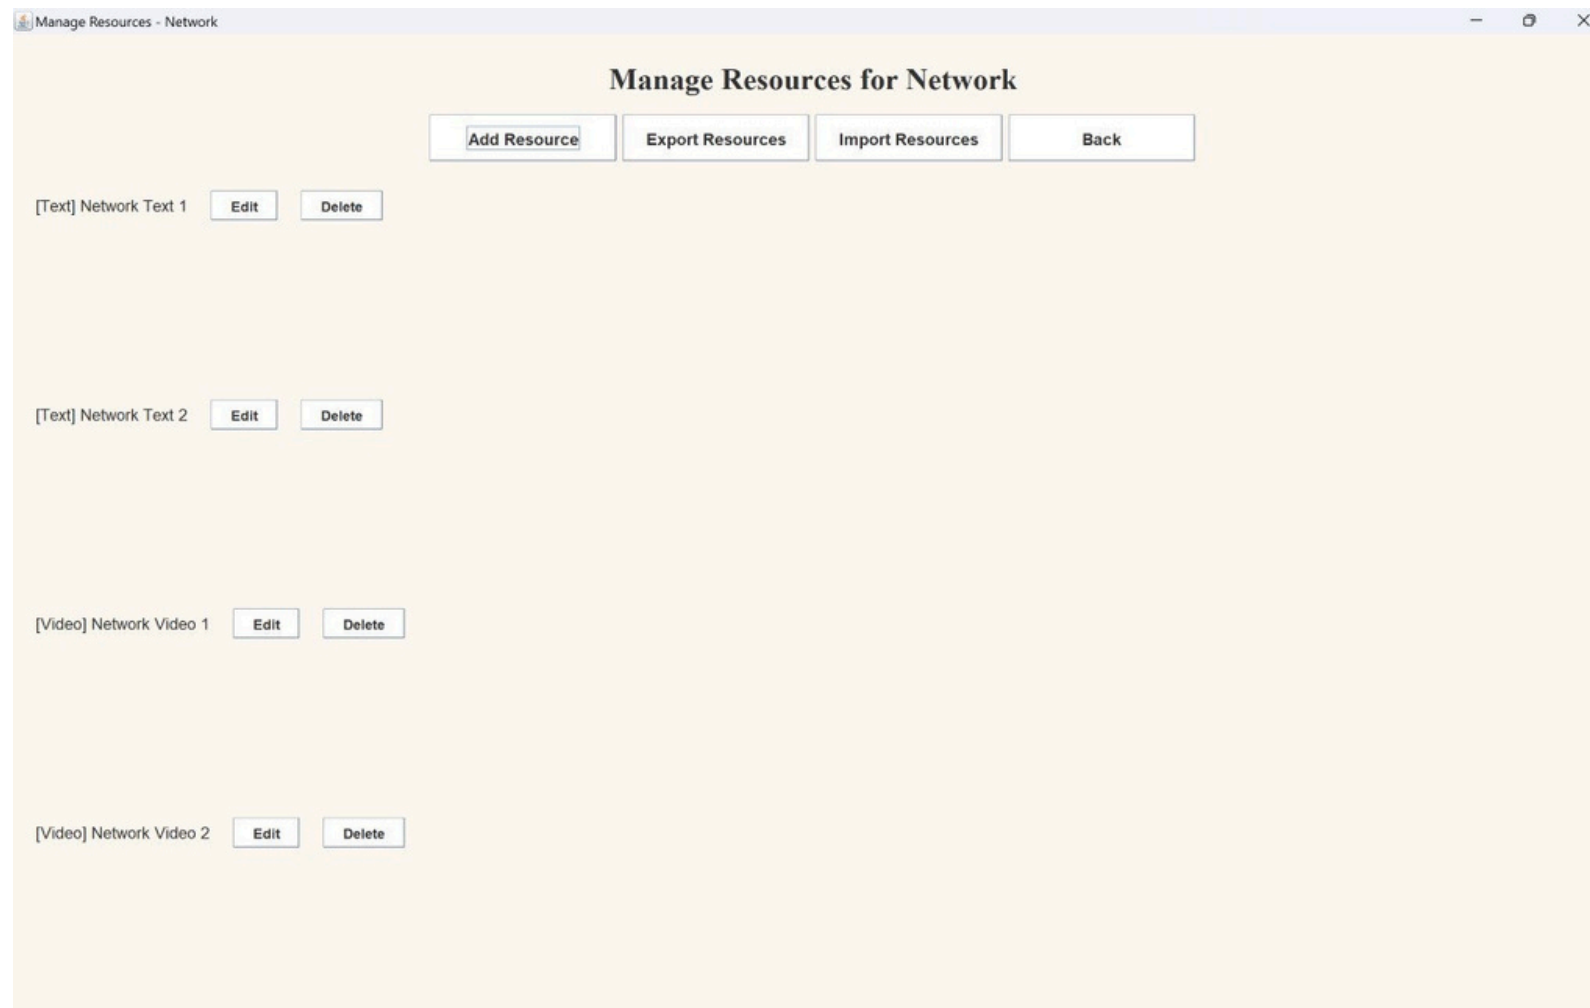

This interface displays the exported list of favorite resources in a text file format for offline access or sharing

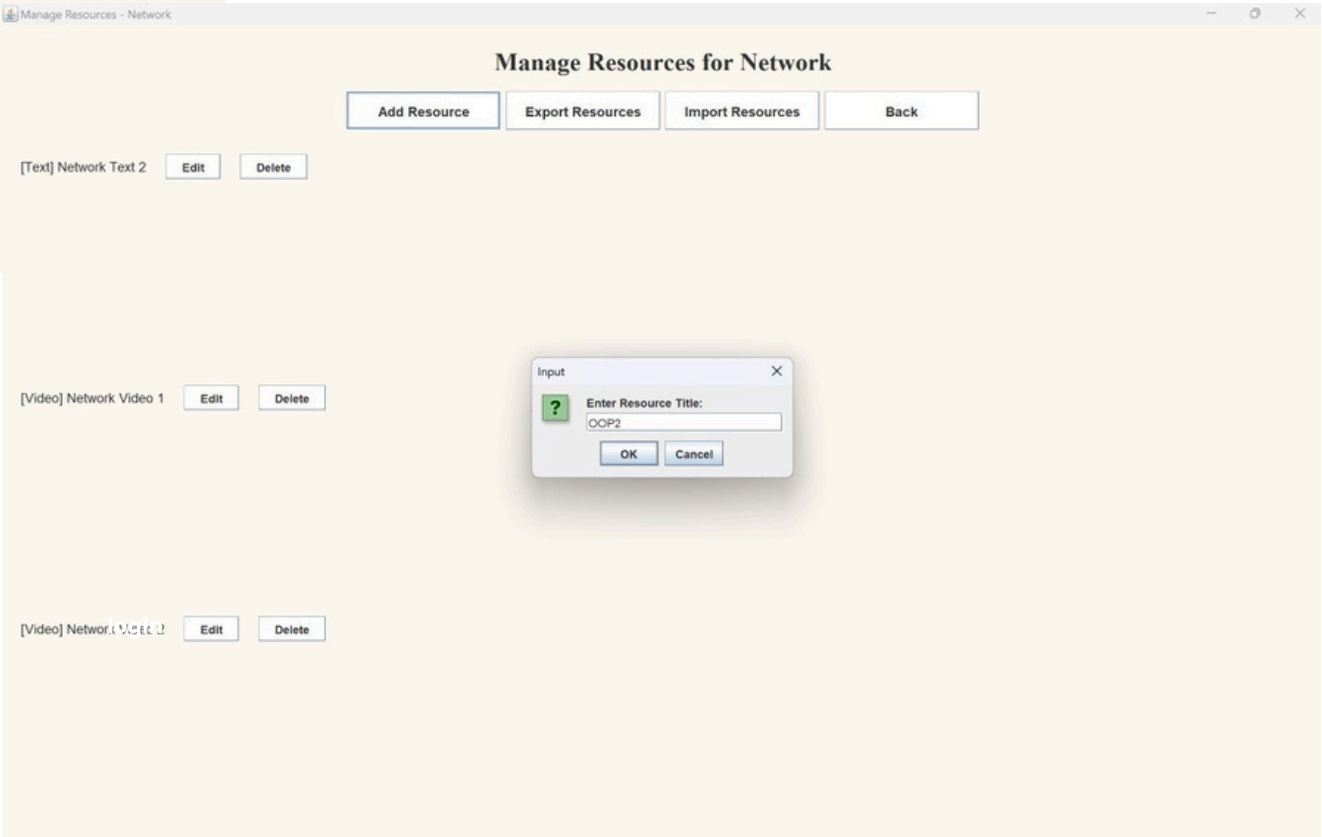

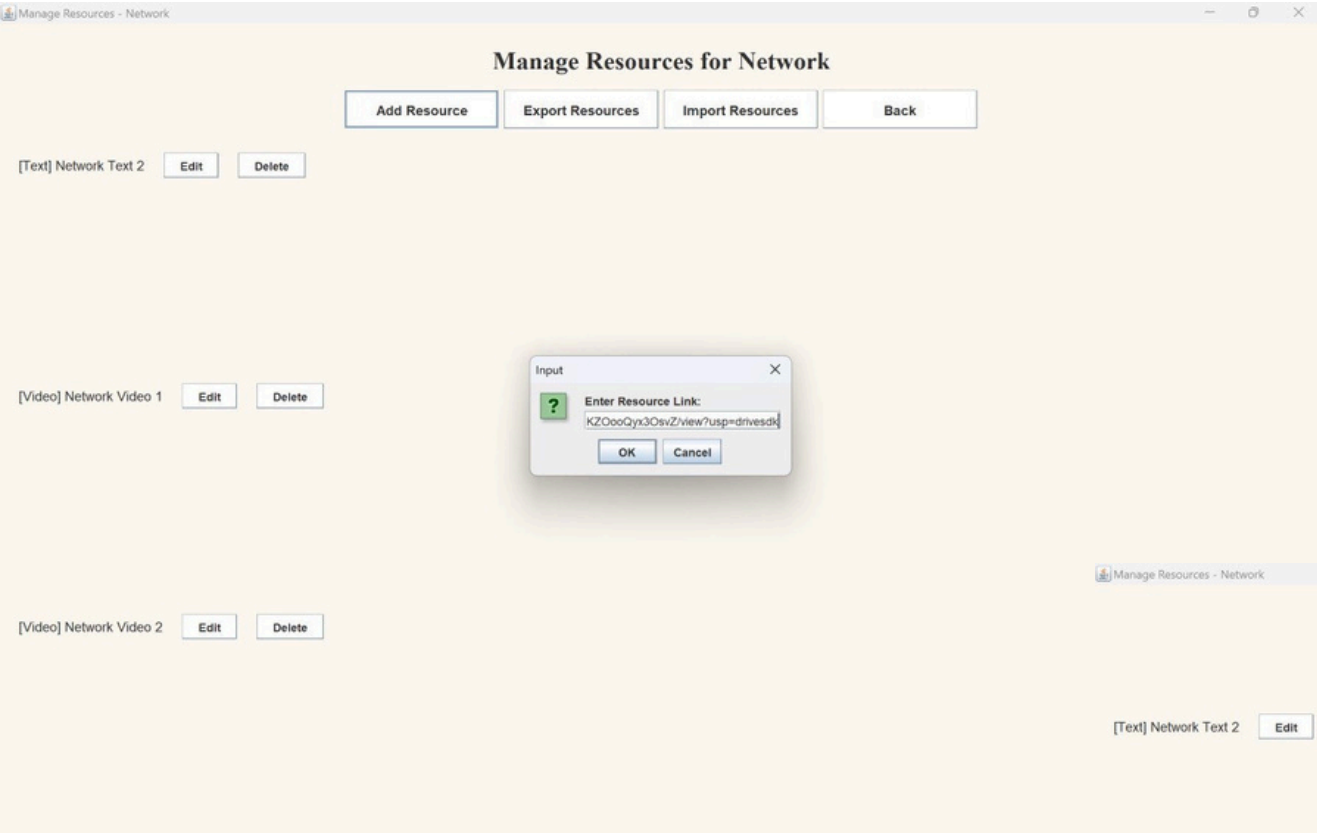

Upon logging in, teachers can choose the academic level to manage subjects and resources accordingly.

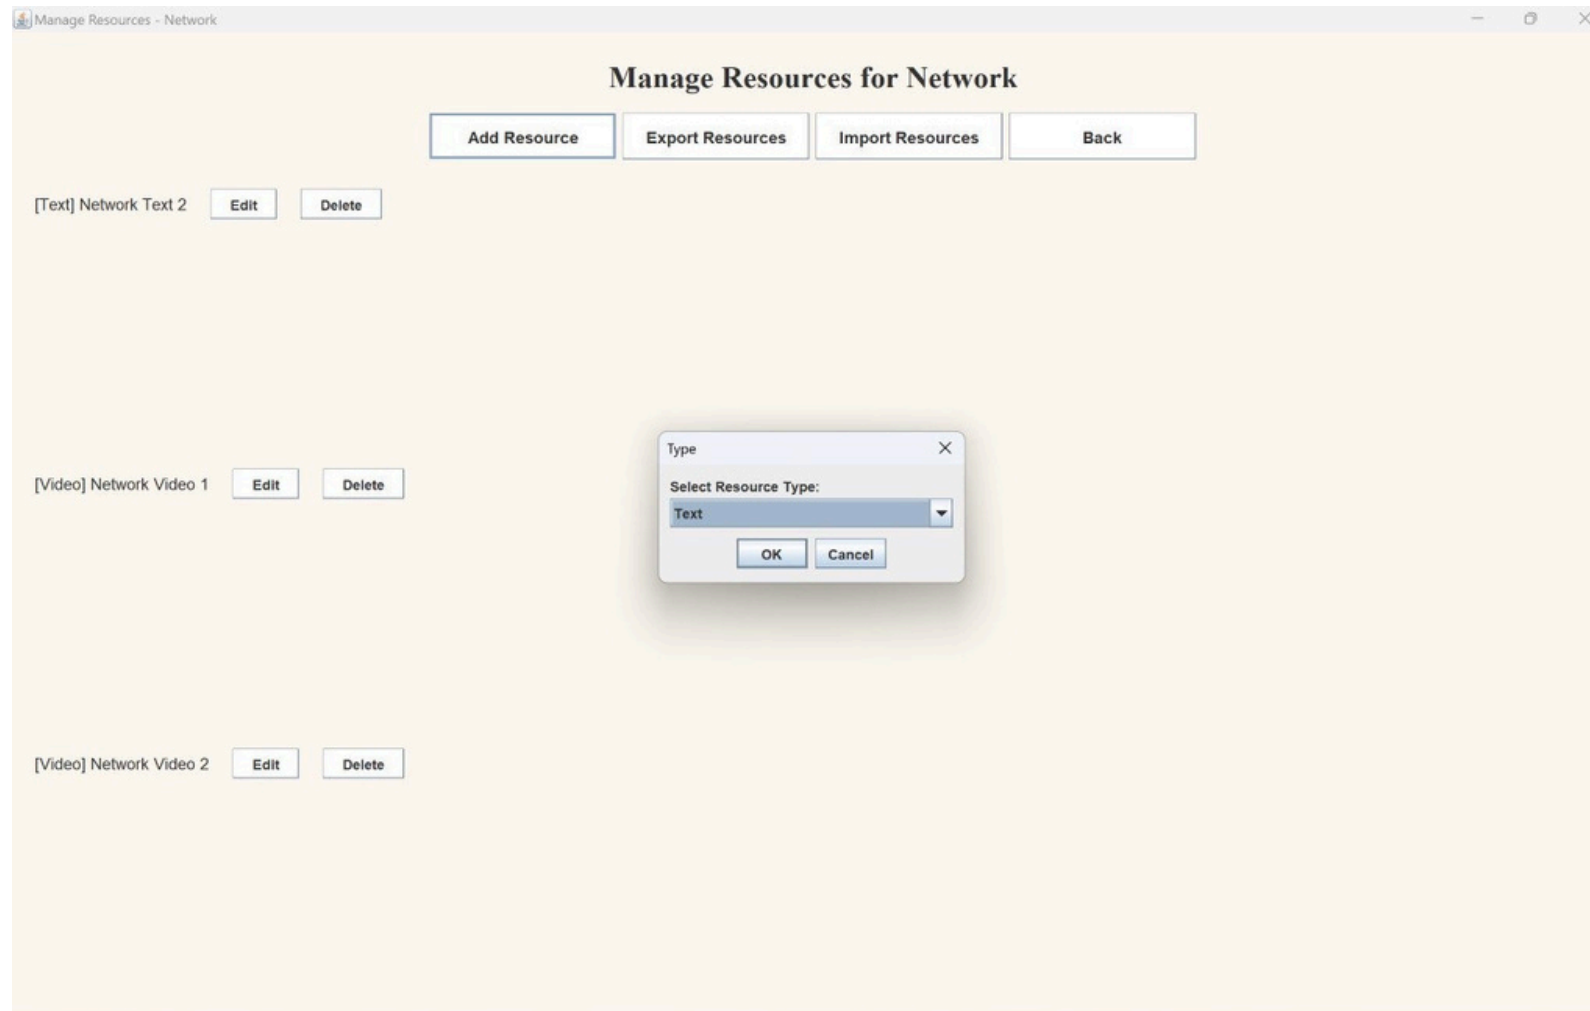

Teachers can view available subjects and proceed to manage resources for the selected subject.

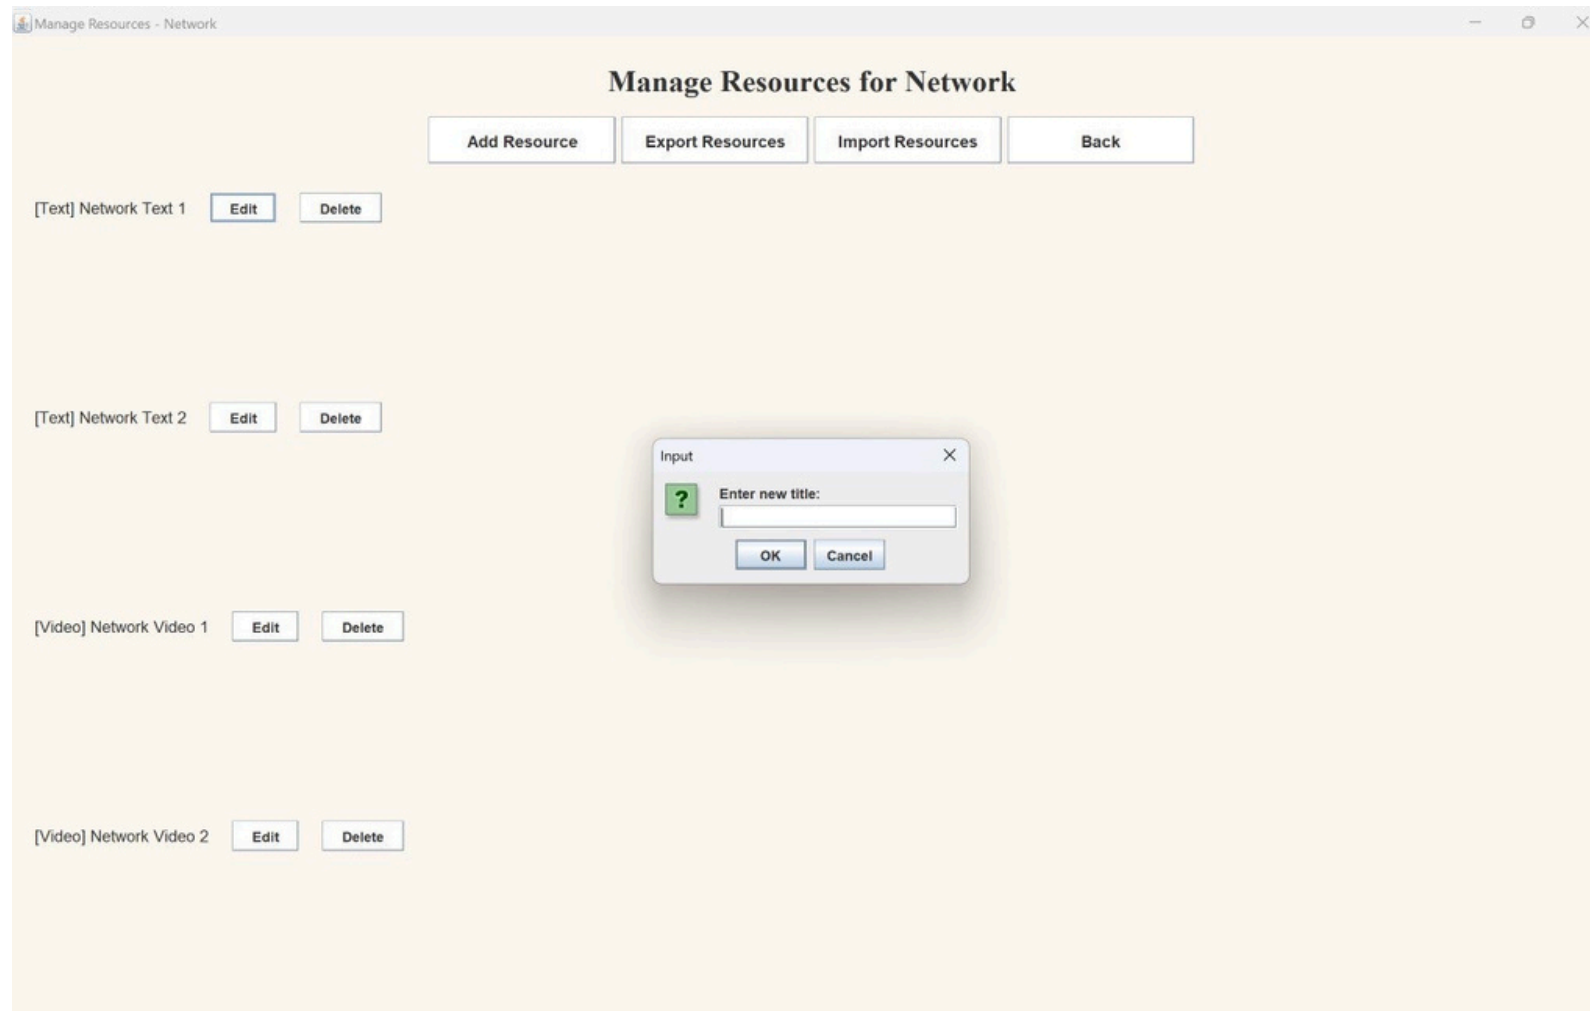

This interface enables teachers to manage all resources for the subject, with options to add, edit, or delete items.

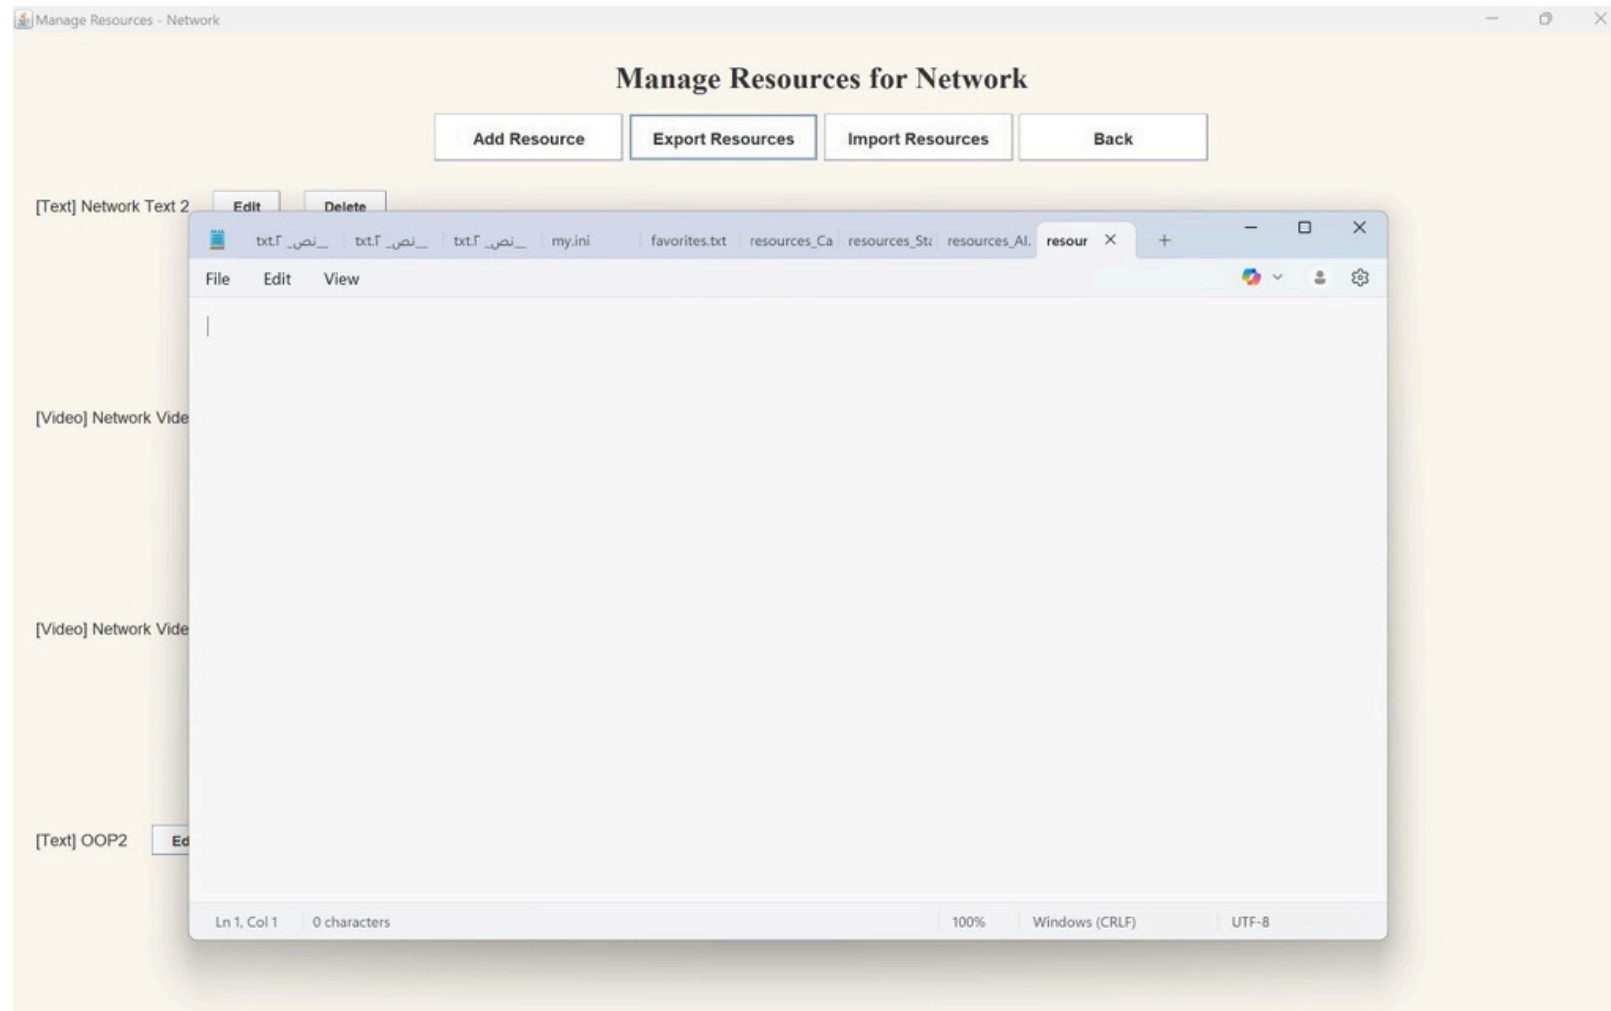

Teachers can input the title and link of a new resource to be added to the subject.

The system prompts the teacher to select the resource type (Text or Video) for better classification.

Teachers can update the title of an existing resource using this prompt window.

Teachers can export the current list of resources to a text file or import new ones from an existing file.

PROJECT FUNCTIONS & FEATURES :

- Allows users to register and log in with role-based redirection (student or teacher)

- Provides a student dashboard that shows subjects based on academic level.

- Allows teachers to view subjects by level and manage related resources.

- Supports full operations (add, Read, Update, Delete) on resources.

- Enables students to mark resources as favorites and manage them.

- Allows students to export favorite resources to a text file.

- Allows teachers to export and import resources using text/CSV files.

- Handles invalid inputs and system errors using JOptionPane and try-catch blocks.
